

One night and one day (September 2003)

1. One night and one day

Just this I'd wish to share with you

To free us from the weight of our settled lives

Just one night to be retained by the painful sweetness of our bond

Oh how I long to be part of your smile once more

The past's our future and the future's our past

Oh how I long to soar just for a while with you

Your hands in mine and that's enough

2. One night and one day

In love I wanna rise with you

And afterwards sink back into the blue

But would the falling be too deep

Maybe we're meant to march our separate ways

All those nights and days I'll long to be part of your smile once more

The past's our future, the future's our past

Oh how I long to soar just for a while with you

Just one kiss and then we'll part again...

Just one kiss and then we'll sigh and die...
